

Ultrax Warranty

Warranty Coverage Increasing to 3 Years

Effective November 12, 2018, the Ultrax warranty coverage will increase from 2 years to 3 years.

This is retroactive to the launch of the Ultrax product line in late 2016. Since its introduction, Ultrax has been very well received by the fishing community and has become a game changer for the competitive fisherman. Ultrax is well designed and manufactured, making it very reliable with a low cost of ownership. The increased warranty coverage will instill a high level of confidence giving the consumer additional peace of mind. By making the warranty retroactive to Day 1, we are thanking the early adopters for their loyalty to the Minn Kota brand!

Note: This is for Ultrax models sold to the original owner only, and this does not include Factory Reconditioned models (FR in the serial number). We are working to modify the Parts and Warranty Portal to accept claims during the 3rd year so disregard the note to submit a proof-of-purchase in these instances.
